JASIAH POWERS

PROJECT PROPOSAL

Dear Jasiah Powers,

Thank you for considering our proposal for your website project. Based on our discussion, we have further refined the proposal to meet your specific requirements. Below is a detailed breakdown of the pages that we will be creating for your website:

1. Home: This page will serve as the main landing page of your website. It will be designed to showcase your work and provide visitors with an overview of your brand and services.
2. About: This page will provide detailed information about you and your company. It will include information about your background, experience, and the services that you offer.
3. Projects: This page will showcase your portfolio of work. We will design this page to highlight your best projects and make it easy for visitors to navigate and explore your work.
4. Pictures: This page will feature a gallery of your images. Visitors will be able to browse your pictures and view them in full-screen mode.
5. Blog: This page will be dedicated to your blog. It will allow you to share your thoughts and ideas with your audience, as well as keep them up-to-date with the latest news and events.
6. Contact: This page will provide visitors with a way to get in touch with you. We will include links visitors can use to contact you.

We estimate that the development of your website will take approximately 1.5-2 weeks to complete, depending on the complexity of the design and the amount of content that needs to be created. We will provide you with regular updates throughout the development process to ensure you are satisfied with the progress.

We will ensure that your website is fully responsive, meaning that it will look great and function properly on all devices, including desktops, laptops, tablets, and smartphones. This is important to ensure your website is accessible to the widest possible audience and provides a great user experience.

We will also be handling the setup of hosting and domain, as well as any necessary configuration to ensure that your website is secure and performs well.

The total cost of the project will be $749, which will be paid in two parts. The first payment of $349 will be due as an advance payment to start the project. The remaining payment of $400 will be due after the completion of the project.

In addition to the project cost, there will be a recurring cost of $12 per year for the domain. We will be using GoDaddy.com as the domain registrar.

We believe this website will help you showcase your work to the world and attract new clients. If you have any questions or concerns, please don't hesitate to contact us.

Thank you for considering our proposal. We look forward to working with you on this exciting project.

Best regards,
Aman Mehta
